Job description . C++ Blockchain developer

"Digital Cloud Payments" - is an IT development company working on custom payment and cryptocurrency solutions. The company is located in the Malaga region, along the pleasant southern coast of Spain.

Our focus is on developing blockchain-based solutions that integrate cryptocurrencies with existing technologies in new and innovative ways. Our projects run the gamut from setting up custom blockchains to integrating cryptocurrency solutions in games. The list of possible new projects just keeps growing as more people become aware of the possibilities offered by integrating blockchain technologies.

You will join our team at our offices in Costa del Sol, just outside Malaga, where we combine work with sunny relaxation. The team comes from a diverse range of backgrounds, but everyone speaks English, which is the corporate language and the work is done in English. We are offering full-time positions, and relocation help may be available for the right candidate.

Salary depends on qualifications and experience, but will be competitive and within the range which is normal for this business.

What You'll Do

- Help develop our systems around payment solutions, community software and cryptocurrency applications
- Be an integrated part of our development crew
- Become an active party in our innovative and dedicated IT team
- Move to Spain

Who You Are

- A guy or a girl with 3 years+ knowledge of C++
- Knows Python
- Uses Git
- Good English skills
- Is good at documenting and writing comments.
- Know how to use Linux

Bonus Skills

- Spanish language
- CSS/JS
- Blockchain development
